```
        ElseIf tipo = "U" And _
               Application.WorksheetFunction.IsText(Rng) Then
            seleccion.Value = UCase(seleccion)
        End If
    Next
End Sub
```

4.4.7.1 SOLUCIÓN

```
Sub Proteger(ByVal sheetName As String)
    Dim sh As Worksheet
    Dim pwd As String

    For Each sh In ThisWorkbook.Worksheets
        If sheetName = sh.Name Then
            Set sheet = sh

            Exit For
        End If
    Next sh

    If (IsEmpty(sheet)) Then
        MsgBox "La hoja " + sheet.Name + " no existe"
    End If

    pwd = InputBox("Ingrese una contraseña.", vbOKCancel)

    sheet.Protect Password:=pwd
End Sub
```

Y para llamar a esta función podemos hacerlo así:

```
Proteger ("Hoja1")
```
