Un ejemplo de uso podría ser:

```
Private Sub UserForm_Error(ByVal Number As Integer, _
                           ByVal Description As MSForms.ReturnString, _
                           ByVal SCode As Long, _
                           ByVal Source As String, _
                           ByVal HelpFile As String, _
                           ByVal HelpContext As Long, _
                           ByVal CancelDisplay As MSForms.ReturnBoolean)
    ' Instrucciones a ejecutar
End Sub
```

6.5.8 Initialize

```
Private Sub UserForm_Activate()
    ' Instrucciones a ejecutar
End Sub
```

6.5.9 Hide

Este evento no requiere de argumentos:

```
UserForm1.Hide
```
