4.4.8.1 SOLUCIÓN

```
Sub Desproteger(ByVal sheetName As String, ByVal pwd As String)
    Dim sh As Worksheet

    For Each sh In ThisWorkbook.Worksheets
        If sheetName = sh.Name Then
            Set sheet = sh

            Exit For
        End If
    Next sh

    If (IsEmpty(sheet)) Then
        MsgBox "La hoja " + sheet.Name + " no existe"
    End If

    sheet.Unprotect Password:=pwd
End Sub
```

Y para llamar a esta función podemos hacerlo así:

```
Desproteger sheetName:="Hoja1", pwd:="E14x25c36!"
```
